

Please do not allow the NAB to dicatate how Traffic and weather are delivered to the public. When they deliver their services every 15-minutes and tease the process so they can charge advertisers more, it is not in th ebest interest of consumers. I am on the road quite a bit and when there is traffic problems whether it be traffic or construction, I need to know immediately. Not just when it convenient or happens to fall into their clock. These broadcasting bullies namely Infinity and Clear Channel need to be stopped. I made my decison when I joined XM Sattelitelite. So I ask you respectively to reject the NAB's petition 04-160.

Thank you for your consideration

Brian Boettcher
